Checklist for authors

In order to make possible the automatic processing of the submissions please prepare the abstract in fine correspondence to the abstract template.

We kindly ask you to check the abstract for **most common errors** before the submission:

1. Please never use any styles except supplied by template. For example: in order to mark the presenting author please apply style "ACNS_AuthorSpeaker" instead of using option "underlined" for style "ACNS_Co-authors".

2. Please give authors name strictly according to template (family name and then initials). For example: spell "Surname N." instead of "Name Surname" or "Surname Name". Also please, do not use all capital letters in authors names as well as "and" instead commas between names.

3. Please give affiliation for each author (using the "ACNS_Footnote_Affiliation" style). In the case of the same affiliations use the same footnotes.

4. References should be numbered by order of appearance in the text, denoted in [square brackets] inside the sentence, such as [1-4]. Please never use footnotes for it.

5. Please, insert references using only "enter" for separation. The numbers will be inserted automatically.

6. Please never modify any pre-settings in the abstract template file such as font sizes, margins, and other formats, to avoid an incorrect layout of the publication.
